# Woodland Sunflower

*Helianthus divaricatus*

Light:	Partial Shade
Soil:	Sand, Loam, Clay
Moisture:	Dry, Medium
Benefits:	Pollinators, Birds, Deer Resistant, Host Plant
Height:	2'-6'
Blooms:	Jul, Aug, Sep
Zones:	3, 4, 5, 6, 7, 8
Color:	Yellow
Spacing:	2'
Root:	Rhizome

Woodland Sunflower features two-inch wide sunflowers blooming from mid-summer to fall and is easily grown in average, dry to medium, well-drained soil in part shade.

The plant is easy to cultivate and should be divided every three to four years to control spread and maintain vigor. A wonderful plant for a multitude of bees, butterflies and other pollinators, Woodland Sunflowers also provide a food source for several birds.
