

Hoary Vervain *Verbena stricta*

Light:	Full Sun
Soil:	Sand, Loam
Moisture:	Dry, Medium
Benefits:	Butterflies, Pollinators, Hummingbirds, Host Plant, Deer Resistant
Height:	2'-4'
Blooms:	July-Sep
Zones:	3, 4, 5, 6, 7, 8
Color:	Lavender
Spacing:	1'
Root:	Fibrous

Beautiful to look at, easy to grow, beloved by bugs and birds. An excellent plant for the Copper Country, since it is super drought tolerant yet handles our occasional downpours with aplomb.

Very nice tucked in with lance-leaf coreopsis, and a host plant for the charming Common Buckeye butterfly to boot.
